(54) Title: PARALLEL PROCESS FOR PROTEIN OR VIRUS SEPARATION FROM A SAMPLE

(57) Abstract: A sample is divided into a series of aliquots with the aliquots being subjected to at least two successive parallel separation steps in order to resolve protein or viral components thereof. The separation steps are performed not only on a sample but subsamples each containing a prelabeled tag to afford comparisons between subsamples. The parallel separation is amenable to high throughput and automation.
